ANKIT KUMAR CHOUDHARY

Software Developer II | Scalable Distributed Systems | High Throughput | Agile Code Review

+91-7067423108 ankitchoudhary.sde@gmail.com linkedin.com/in/ankitchoudhary1902 Bengaluru, Karnataka

SUMMARY

Results-driven Software Developer II with a strong track record of designing scalable distributed systems, ensuring high availability, and optimizing backend infrastructure. Proven expertise in driving **end-to-end development**, performing rigorous **PR reviews**, and conducting QA testing while **collaborating** seamlessly with Product and Frontend teams. Adept at leveraging Python, Django, Java, and Spring Boot to engineer high-throughput microservices and automate complex workflows. Demonstrated success in utilizing data analytics for anomaly detection, notably reducing operational leakage and saving ₹1.3 Cr quarterly. Passionate about translating **product requirements** into **high-performance, cost-effective technical solutions.**

EXPERIENCE

12/2024 - 05/2025

Gurugram, Haryana

Software Developer II

Spinny

Lead Leakage

- **Designed** a **distributed system** analyzing call logs from 2,500 inspectors for anomaly detection, preventing unauthorized transfers.
- Tech: **Python**, **Django**, **MongoDB**, Redis Caching, **Firebase**.
- Detected 300+ activities monthly, **reducing leakage by 22%**, **saving 1.3 Cr quarterly**.

Cost Prediction

- Engineered an **automated** cost computation system to calculate part and labour costs for **5000+ daily inspections** using a Camunda provided issue-probability matrix.
- Tech Stack: **Python**, **Django**, Pandas, **Redis** Cache.
- Reduced manual effort by **85 percent** and improved pricing consistency, directly **impacting lead closure**.

06/2022 - 08/2024

Bengaluru, Karnataka

Software Developer

Goldman Sachs

Bundle Management System

- **Designed and developed** a **secure** internal **APK distribution system** to serve on-ground banking employees post migration from Google Workspace to Zoho, enabling APK access without Play Store dependency
- Tech Stack: **Java**, **Spring Boot**, **SQL**, **AWS S3**
- Scaled to support **50+ APK releases/month** with **zero deployment downtime** and **200ms response time** for version check APIs

Prospect Capture

- **Increased customer engagement** by **23%** by **collaborating** in design and implementing an **end-to-end** prospect capture form for targeted marketing emails.
- Tech Stack: **Java**, **Spring Boot**, **SQL**, Kafka.
- Optimized to handle **120 transactions per second** with a **P99 latency of 70ms.**

EDUCATION

2018 - 2022

Patna, Bihar

B.Tech - Computer Science and Engineering

National Institute Of Technology, Patna

CGPA **7.51** / **10.00**

KEY ACHIEVEMENTS

- **Saved 1.3 Cr quarterly by engineering an anomaly detection system that reduced lead leakage by 22%**
- **Expert (1800+) on CodeForces**

SKILLS

Programming

Data Structures and Algorithms | **System Design** | **JAVA** | **Python** | **C++**

Technologies/Frameworks/Dev Tools

SpringBoot | **Django** | **React.js** | **MongoDB** | **Kafka** | **Git** | **SQL** | **PostgreSQL** | **Redis**
